Education

University of Washington, Bothell

Second Year, 2029

Intended Major: Law, Economics and Public Policy

Skyline High School

IBDP, 2026

Sammamish, WA

Skills

Data Analysis: Python, Java, JavaScript, LaTeX, HTML/CSS, Git, Flutter

Tech & Tools: dataset engineering, model evaluation, literature review, Google Workspace, Microsoft 365, Canva, Visual Studio.

Languages

Urdu (native)
English (fluent)
Finnish (fluent)
Punjabi (limited)
Spanish (limited)

Certifications

Artificial Intelligence (Pearson)
Computational Thinking (Pearson)
CPR Certified (FEMA)
CERT (FEMA)
Food Handler's Permit (WA State)

Profile

AI Policy Researcher and student of Law, Economics, & Public Policy at the University of Washington. His research focuses on AI legislation topical and structural trends. He has worked with Washington state legislators on local AI legislation to bridge research with legislation. And is interested in studying coordination frameworks of AI governance to help make effective, implementable AI policies.

Selected AI Governance Research

Khan, M. A., Akengin, M. E., Salahuddin, O., & Rushdi, A. (2026). *Position: Bridge the AI development-regulation gap through dedicated committees and adaptive legislation. ICML 2026 Position Paper Track.* (Propose sunset clauses to lower the political cost of enacting AI legislation and directional success gates to avoid regulatory leakage that undermine AI regulations. Supervised by the Director of Industry Programs, **Human-Centered Artificial Intelligence, Stanford University.**)

Khan, M. A., Akengin, M. E., Salahuddin, O., & Rushdi, A. (2026). *The Path to AI Governance: First Systematic Analysis of AI Governance Across 50 U.S. States. Trustworthy AI for Good Workshop at ICML 2026*

Khan, M. A., Akengin, M. E., & Rushdi, A. (2025). *From Proposals to Enactment: The Procedural Bottleneck in AI Safety Regulation. 3rd Workshop on Regulatable ML at NeurIPS 2025.* (Analyzed 150 US Congressional AI bills; trained predictive model identifying factors for the 59% stall rate)

Policy & Civic Experience

Legislative Testimony on AI Chatbot Bill (HB2225 / SB5984), WA House Committee on Technology, Economic Development, & Veterans

Invited to testify in support of passed in-state AI Safety legislation, providing research-based inputs to a House Committee.

Legislative Intern, WA State Rep. Osman Salahuddin (WA LD-48)

Provided youth-centered input on technology and education policy; authored internal notes on AI oversight and regulatory gaps.

Project Manager, Statewide GOTV Operations (WA AMAC)

Managed data tracking and reporting for statewide civic outreach; led day-to-day volunteer operations across calls, texts, and mail campaigns for 20+ volunteers.

Leadership & Service

Panel Moderator, AI Sovereignty (6th MusIML Workshop, ICML 2026)

Organized a panel with leading researchers from Stanford, GovAI, QCRI & Google; facilitated audience Q&A on AI impact on industry.

Panel Co-Moderator, Responsible AI (5th MusIML Workshop, NeurIPS 2025)

Co-moderated a panel with researchers from Stanford, Edinburgh, & industry; facilitated audience Q&A on safe AI deployment.

Technical & Applied Experience

Qatar Computing Research Institute-HBKU, Summer Research Intern

Conducted research and led projects on Cultural Ethical norms Alignment in LLMs and Legal AI Assistant providing credible legislative strategy and information.

AI Policy Legislation Tracker, Research Project

Developed service to autonomously analyze U.S. Congress and WA State bills mentioning "Artificial Intelligence" to identify procedural correlates to legislative progress.
